

Large Systems and SAFe

Speaker: Harry Koehnemann

Harry Koehnemann, SAFe Fellow and Principle Contributor

Harry focuses on the Enterprise Solution Delivery domain and software and systems engineering practices in SAFe. He spent 10 years as a software engineer and another 20 consulting with large-system builders in aerospace, defense, automotive, and others to improve their execution with product development lifecycle practices including Lean, Agile, MBSE, requirements management, quality management and compliance activities. Harry is a regular presenter at Agile and systems engineering conferences.
